### Sanya Bathla Taneja

Email: sbt12@pitt.edu

Website: sanyabt.github.io | LinkedIn | GitHub | Semantic Scholar

#### **EXPERIENCE**

### National Library of Medicine, National Institutes of Health (NIH) Research Intern | May – July 2023

 Developed entity linking methods for diseases in PubMed articles using natural language processing with biomedical ontologies, BERT-based models, and ChatGPT API with Langchain library.

## University of Pittsburgh, Intelligent Systems Program Graduate Student Researcher | February 2020 – Present

- Led <u>knowledge graph</u> research and development with 1M nodes and 9M edges, combining literature-based discovery and biomedical ontologies for generation of mechanistic hypotheses for natural product-drug interactions and safety surveillance using pharmacovigilance signals from adverse event reporting systems. Presented related work at 7 conferences, with 1 Best Poster Award and 2 peer-reviewed publications.
- Developed <u>custom OMOP vocabulary</u> and OBO ontology representations for 300 natural products and constituents for KG and pharmacovigilance using semantic representations and embedding-based models to capture natural products in spontaneous reports.
- Responsible for longitudinal EHR data extraction, data analysis, and technical development of machine learning and case-control epidemiological analyses OMOP Common Data Model for Alzheimer's disease risk factors using OHDSI methods in R and Python, with 1 peer-reviewed publication and 2 conference presentations.

# University of Pittsburgh, School of Medicine

#### Research Assistant | September 2018 – February 2020

 Developed natural language processing and machine learning pipelines for twitter surveillance of vaping. Responsible for <u>RITHM</u> software framework maintenance, documentation, and upkeep of the GitHub repository for real-time Twitter data mining, with <u>3 peer reviewed publications</u>.

# University of Pittsburgh and Malawi, Africa Research Intern | June – August 2019

 Developed Bayesian networks and machine learning models to diagnose childhood malaria in Malawi in collaboration with Global Health Informatics Institute in Malawi.

#### **Amazon India**

#### Software Development Engineer Intern | February - July 2018

• Developed backend APIs for the Seller and Retail website using Java, Spring MVC, Coral, JavaScript, and Handlebars.

#### **EDUCATION**

PhD Intelligent Systems | University of Pittsburgh | 2020-2024 MS Intelligent Systems | University of Pittsburgh | 2020 B.Tech. Computer Science and Engineering | Indira Gandhi Delhi Technical University | 2018

#### **SUMMARY**

PhD candidate in Intelligent Systems and computer scientist with research experience in natural language processing, machine learning, and knowledge representation and their applications in healthcare. Proficient in Python and SQL, with strong communication and writing skills.

#### **SKILLS AND INTERESTS**

Skills and Interests: Machine Learning, Natural Language Processing, OMOP Common Data Model, EHR Data Analysis, Bayesian Networks, Knowledge Graphs, Biomedical Ontologies, Scientific Writing, Large Language Models

**Technologies:** Python, SQL, R, Git, C++, RDF, OWL, Neo4j, GPT **Libraries:** NLTK, Spacy, Pandas, Scikit-learn, Keras, Networkx, Tensorflow, Langchain

# PROFESSIONAL ACTIVITIES

- Student Editorial Board Member, Journal of the American Medical Informatics Association (JAMIA) | 2022-2023
- Peer Review (Journal of Biomedical Informatics, Bioinformatics, BMC Bioinformatics, Intelligent Systems for Molecular Biology, AMIA Informatics Summit)
- Co-organized & coordinated discussion group on Symbolic AI and Knowledge Graphs with 20 participants and 6 guest speakers | 2022
- Awarded Provost Fellowship | 2023
